DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 5 is rejected under 35 U.S.C. 102(e) as being anticipated by Col (patent No. 6,647,489).

3. Col taught the invention as claimed including a data processing ("DP") system comprising:

a) Retrieving operating data from memory (load stage 105 in fig.3, and fetch stage 400 in fig.4) (e.g., see col. 5, lines 6-16, and col. 13, lines 5-47);

b) Forwarding operand data, opcode and target location to an execution unit associated with the system (e.g., see col. 13, lines 5-30, and fig.4 (cont.)); and

c) Executing each instruction by operating on the operand data in accordance with the opcode and storing the results of the operation on the operand data at a location in the memory specified by the target location (e.g., see col. 13, lines 12-67 and fig. 4 (cont.)).

Art Unit: 2183

4. Applicant's arguments with respect to claim 5 have been considered but are moot in view of the new ground(s) of rejection.
